

Golden Ears Half Marathon

March 13, 2011

Run Canada Certified: 2011-BC-___-BDC

Notes:

1. The finish line is common to both the half marathon and the 10 km run, but the two events finish from different directions. The distances are measured from the indicated start line to the finish line. If electronic timing is used the start lines need to be adjusted as required to ensure that the total distance is correct. For example, if a 2 metre wide mat is used and centred on the finish line each of the start lines will need to be moved east by 1 metre.
2. Runners must be constrained to the right or left side of the road as indicated on the map.
